

Interpersonal Neurobiology and 20 Years of Interdisciplinary Thinking and Application - Video

Price: \$39.00

Description

"Interpersonal Neurobiology and 20 Years of Interdisciplinary Thinking and Application: The Past, Present and Future of Consilient Collaboration In the last 25 years the field of Interpersonal Neurobiology has emerged as a consilient approach that combine all fields of science into one framework for understanding the development of the human mind and mental health. This video presentation highlights the central role of integration at the heart of health. It also explores how the mind can be defined as a self organizing, emergent, embodied and relational process that regulates energy and information both within us and between ourselves and others."
